

Automation Technician 0 – Junior/Entry Level

Job Type: Full-Time

Salary: \$18 – \$22 per hour, Depending on Experience

Excellent career opportunity to work for an expanding, quality-driven Industrial Automation Service organization!

Position Summary:

An Automation Technician 0 is a junior/entry level position. The applicant needs to be reliable, work well with others in a team environment, and be hard-working with attention to detail. The prospective employee will be embedded on a team, receiving hands-on training from the onset of employment. The expectation will be for the Technician to learn and take responsibility for performing tasks accurately and in a timely manner. Candidates will learn to install & service instruments, develop an understanding of RTU/PLC programming, and become skilled at trouble-shooting instrumentation & automation hardware and the processes associated with upstream and midstream oil & gas operations. This is an excellent opportunity for the right person looking for a lifelong career with endless potential.

The following qualifications are required:

- High school graduate or GED equivalent from an accredited institution
- Must be customer-oriented and maintain excellent relationships with customers and team members
- Must be reliable, able to work independently, hard-working, and willing to work outdoors, sometimes in extreme weather environments
- Strong computer experience, Programming experience is a plus.
- Willingness to travel to customer sites
- Valid driver's license and good MVR
- Able to speak, write and read the English language

The following qualifications are preferred:

- Associate degree in Instrumentation or Engineering Technology; or equivalent experience
- Able to read & interpret schematics, drawings as well as comprehension of electricity & circuits
- Troubleshooting & calibrating control systems
- Set up instrumentation & calibrate using meters & tools
- Preventative & corrective maintenance background
- Instrumentation installation background
- Experience with install and maintenance projects in the automation of industrial processes
- Testing functions
- Experience working with PLC's, HMI's, RTUs & SCADA systems including Rockwell/Allen Bradley, ABB, Fisher ROC, Honeywell, Siemens, Emerson Delta-V, Schneider Electric and/or Modicon
- Troubleshoot I/O's
- Previous experience in the oil & gas industry
- Experience working in the field at customer sites
- Industrial Combustion System troubleshooting, tuning, setup, and/or design experience preferred

R3 Automation offers eligible employees a generous benefits package, including the following:

- Training (On the Job & Curriculum-based)
- Company Vehicle
- Paid Time Off (vacation days, sick days, holidays)
- Medical, Dental, Vision and Life Insurance
- 401(k)

Any offer of employment is contingent upon passing pre-employment requirements, including drug screen and criminal background check.
